

# How to prepare a Project Proposal?

**ITE 1943**

**BY DR. A. T. P. SILVA**

## Parts of the Project proposal

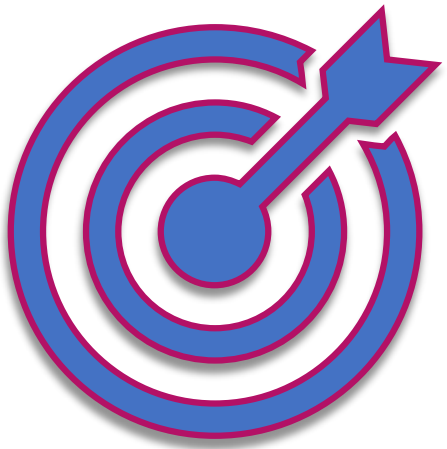

- ▶ Chapter 01 - Introduction
- ▶ Chapter 02 - Related work
- ▶ Chapter 03 - Proposed Solutions
- ▶ References

Minimum one page for each  
chapter

# Introduction

- ▶ This section covers the importance of the problem.
- ▶ Highlight why do you want to have a simple IT solution for the problem
- ▶ Clearly state what is the problem that you are going to solve during the this course

# Chapter 1 - Introduction

- ▶ **This section should cover following subsections**
  - ▶ **Background** - Describe the motivation to your problem
  - ▶ **Aim & Objective** - Statement of the problem which you are aiming to develop
  - ▶ **Objectives** - define the objectives of your project

# Chapter 02 – Related Work

- ▶ Search similar systems and solutions
- ▶ Identify features of the existing solutions
- ▶ Identify what missing features are (not too many)
- ▶ Prepare a summary Table
- ▶ Briefly describe what each system is
- ▶ Define a new sub section for each system

## Chapter 03 - Poposed solution

- ▶ Identify functionalities of your porposed system
- ▶ identify input, process and output
- ▶ Develop a Input – Process - Output model
- ▶ Describe each functionality coming under processes in detail

# References

- ▶ Add references to the existing system you found.
- ▶ Add complete references: authors, publishers, year, title, etc..
- ▶ Cite all the references in the text
